AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the present application.

LISTING OF THE CLAIMS:

nuclear fuel assembly; and

1 to 8 (Cancelled).

providing a repair sleeve, the repair sleeve having a shaft with a first end, a second end and a diameter, the diameter configured to fit into a guide thimble opening of a top nozzle of the fuel assembly, wherein the diameter of the shaft is dimensioned such that an exterior of the shaft fits into the guide thimble opening, wherein the shaft has at least two openings, and at least two tendons extending through the openings, the tendons configured to deflect in an instance of a horizontal load on the tendon during insertion, each of the tendons having at least one a projection configured to be inserted into a dimple of a guide thimble sleeve, and the

9. (currently amended) A method for repairing a nuclear fuel assembly, comprising:

inserting the repair sleeve in the guide thimble opening in the top nozzle of the nuclear fuel assembly such that the projections of the tendons project into the dimples of the guide thimble sleeve; and

repair sleeve having a lapped edge for installation on the top of the top nozzle of the

inserting a thimble insert assembly into an interior of the repair sleeve.

- 10. (original) The method according to claim 9, wherein the step of inserting the thimble insert assembly into the interior of the repair sleeve prevents further deflection of the repair sleeve in a horizontal direction.
- 11. (new) The method according to claim 9, wherein the shaft has two openings and two tendons extending through the openings, each of the tendons having one projection.

- 12. (new) The method according to claim 10, wherein the shaft has two openings and two tendons extending through the openings, each of the tendons having one projection.
- 13. (new) The method according to claim 9, wherein the at least one projection is configured in a trapezoidal shape or a hemispherical shape.
- 14. (new) The method according to claim 13, wherein the at least one projection is configured in a trapezoidal shape.
- 15. (new) The method according to claim 13, wherein the at least one projection is configured in a hemispherical shape.
- 16. (new) The method according to claim 10, wherein the at least one projection is configured in a trapezoidal shape or a hemispherical shape.
- 17. (new) The method according to claim 16, wherein the at least one projection is configured in a trapezoidal shape.
- 18. (new) The method according to claim 16, wherein the at least one projection is configured in a hemispherical shape.
- 19. (new) The method according to claim 11, wherein the projection is configured in a trapezoidal shape or a hemispherical shape.

Appl. No. 10/733,213 Response to March 22, 2007 Office Action Page 5

- 20. (new) The method according to claim 19, wherein the at least one projection is configured in a trapezoidal shape.
- 21. (new) The method according to claim 19, wherein the at least one projection is configured in a hemispherical shape.
